

AMHA Behavioral Health Services

We offer a range of treatment and consultation services for individuals, couples & families, including specialized assessment, second opinions, and proven short-term counseling and psychotherapies, such as cognitive therapy, brief dynamic therapy, hypnosis & biofeedback. We also provide training and consultation for organizations and professionals.

We work closely with primary care physicians & psychiatrists to coordinate care, and offer flexible appointment scheduling at various locations.

We participate in most major insurance and managed care panels.

Who We Are

We are a group of like-minded professionals with a common commitment to high quality brief and effective treatments for mental health problems. We share an emphasis on action-oriented treatments and use methods which have been proven effective in clinical research. A number of our staff are active in research & clinical supervision & training. We provide on-site training for physicians and staff for managing their patients' behavioral health problems at the primary care level. In addition, we train & supervise mental health professionals in evidence-based treatments, and offer speakers on mental health topics to interested organizations.
